

KG HCP200 INSTRUCTIONS

- 1** Turn the new key to be programmed to the "on" position
- 2** Insert the KG HCP200 into the OBD port
- 3** Wait for the orange light in the KG HCP200 to stop flashing
- 4** If red light illuminates, repeat the process again. If green light illuminates this indicates key programming success.
- 5** Remove key, close doors & test remote. Then test that key starts the car.

Please note:

- *Old keys or keys programmed to other vehicles cannot be programmed.*
- *KG HCP200 is designed to program genuine keys & may not work with aftermarket products.*
- *KG HCP200 is designed to program VS - VZ commodore keys & their Statesman equivalents only.*
- *KG HCP200 cannot program HSV versions of these vehicles.*
- *KG HCP200 cannot program keys to vehicles with a locked BCM.*
